F1	01/04/2014	Fund assets fail to deliver returns in line with the anticipated returns underpinning valuation of liabilities over the long-term	The achievement of fully funded pension liabilities over the long term	4	3	12	Only anticipate long-term return on a relatively prudent basis to reduce risk of under-performing. Assets invested on the basis of specialist advice, in a suitably diversified manner across asset classes, geographies, managers, etc. Analyse progress at three yearly valuations for all employers. Inter-valuation roll-forward of liabilities between valuations at whole Fund level. Actuarial Review on a like for like basis has confirmed a strong deficit recovery plan.	2	3	6	→	Low	Financial	Head of Pension Fund	July 2016	Due to increased uncertainty following the BREXIT vote and possible negative long term implications, this risk will be closely monitored to determine whether the likelihood of this risk materialising needs to be increased from 2 to 3, which would increase the overall risk rating from low to medium.					
F2	01/04/2014	Inappropriate long-term investment strategy.	The achievement of fully funded pension liabilities over the long term	4	3	12	Regular monitoring of Fund's cash flow with actuarial estimates of future cash flow position. Overall investment strategy options including diversification considered as an integral part of the funding strategy. Use of asset liability modelling. Actuarial Review on a like for like basis has confirmed a strong deficit recovery plan.	2	3	6	→	Low	Financial	Head of Pension Fund	July 2016						
F3	01/04/2014	Fall in risk-free returns on Government bonds, leading to rise in value placed on liabilities.	The achievement of fully funded pension liabilities over the long term	4	3	12	Stabilisation modelling at whole Fund level allows for the probability of this within a longer term context. Inter-valuation monitoring, as above. Some investment in bonds helps to mitigate this risk. Actuarial Review on a like for like basis has confirmed a strong deficit recovery plan.	2	3	6	→	Low	Financial	Head of Pension Fund	July 2016

F4	01/04/2014	Increasing Pension Fund deficit	The achievement of fully funded pension liabilities over the long term	4	3	12	Actuarial review via Triennial Valuation and regular update reports. Regular consideration by Pension Committee on manager performance relative to funding assumptions, funding position and funding strategy. Actuarial Review on a like for like basis has confirmed a strong deficit recovery plan.	2	3	6	→	Low	Financial	Head of Pension Fund	July 2016							
F5	01/04/2014	Active investment manager under-performance relative to benchmark.	Maximising investment returns to help the Fund achieve its funding targets	4	3	12	Quarterly investment monitoring analyses market performance and active managers relative to their index benchmark. Diversification of investments across asset classes and across different fund managers	3	3	9	→	Medium	Financial	Head of Pension Fund	July 2016	Due to increased uncertainty following the BREXIT vote and possible negative long term implications, this risk will be closely monitored to determine whether the likelihood of this risk materialising needs to be increased from 2 to 3, which would increase the overall risk rating from low to medium.						
F6	01/04/2014	Pay and price inflation significantly more than anticipated.	The achievement of fully funded pension liabilities over the long term	4	2	8	The focus of the actuarial valuation process is on real returns on assets, net of price and pay increases. Inter-valuation monitoring, as above, gives early warning. Some investment in index-linked bonds also helps to mitigate this risk. Employers pay for their own salary awards and should be mindful of the geared effect on pension liabilities of any bias in pensionable pay rises towards longer-serving employees.	3	2	6	→	Medium	Financial	Head of Pension Fund	July 2016

F7	01/04/2014	Unexpected increase in employer's contribution rate	To stabilise changes in employer contribution rates over the long term	4	3	12	An explicit stabilisation mechanism has been agreed for eligible employers as part of the funding strategy. Other measures are also in place to limit sudden increases in contributions. Obtain information on financial strength of individual employers. Discuss with employers their ability to absorb rises in their level of contribution. Where appropriate mitigate impact through deficit spreading and phasing in of contribution rises, with appropriate security from employers and further analysis by the Fund's actuary.	2	3	6	→	Low	Financial	Head of Pension Fund	July 2016								
F8	01/04/2014	Orphaned employers give rise to added costs for the Fund	To ensure individual employers in the Fund are responsible for their own costs	4	3	12	The Fund seeks a cessation debt (or security/guarantor) to minimise the risk of this happening in the future. At risk employers are identified and are engaged in discussions over remedial actions in advance of retirement of all active members. If it occurs, the Actuary calculates the added cost spread pro-rata among all employers	2	3	6	→	Medium	Financial	Head of Pension Fund	July 2016								
F/D1	01/04/2014	Pensioners living longer, thus increasing cost to Fund.	The achievement of fully funded pension liabilities over the long term	5	2	10	Set mortality assumptions with some allowance for future increases in life expectancy. The Fund Actuary has direct access to the experience of over 50 LGPS funds which allows early identification of changes in life expectancy that might in turn affect the assumptions underpinning the valuation. The Fund also sets life expectancy assumptions using ClubVita, which is a specialised longevity company and provides life expectancy assumptions based on the profile of the Fund's own membership. Administering Authority encourage any employers concerned at costs to promote later retirement culture. Each 1 year rise in the average age at retirement would save roughly 5% of pension costs.	3	2	6	→	Medium	Funding/ Demographic	Head of Pension Fund	July 2016

A community admission body will only be admitted to the Fund if they have a funding guarantee from a scheme employer with tax raising powers. A surety bond to cover the cost of paying pensions early if the company goes into liquidation is also generally required by the scheme employer to cover the potential risk of the admitted body becoming insolvent and the value of this surety or bond is reviewed regularly to ensure it provides adequate cover for the financial risks involved.	3	3	9	→	Medium	Funding/ Demographic	Head of Pension Fund	July 2016
