

Report to Gloucestershire Health and Wellbeing Partnership

Date:	30 May 2023
Report Title:	Exemplar Themes
Decision or information item:	Information
Authors:	Zoe Clifford/Becky Willmoth
Background:	<p>The concept of exemplar themes seeks to develop our Health and Wellbeing Partnership (HWP) working through learning how the partnership can add value and create greater impact, by collectively coming together.</p> <p>The three themes to be taken forward are blood pressure, smoking and employment and were highlighted in the Integrated Care Strategy as topics for the HWP to coalesce around.</p>
Key Information:	<p>This paper proposes that to progress these themes, each should be approached differently, to account for the different context of each and to maximise the learning for the HWP:</p> <ol style="list-style-type: none"> 1. Blood pressure – Taking a data informed approach with co-designed interventions. 2. Smoking – Using the Population Intervention Triangle to strengthen links between the service, civic and community centred parts of the system. 3. Employment – Create a cultural shift and build an employment collaborative. <p>The paper was co-authored by the Exemplar Themes Steering Group, whose membership is listed overleaf.</p>

Name	Organisation	Role

Recommendations:

The Health and Wellbeing Partnership is requested to:

1. Note and endorse the proposed approaches for each of the exemplar themes.
2. Endorse the continuation of the Exemplar Themes Steering Group to allow progression of themes in between Health and Wellbeing Partnership meetings.
3. Note that detailed action plans will be developed for each exemplar theme.
